Directions for Reward Charts

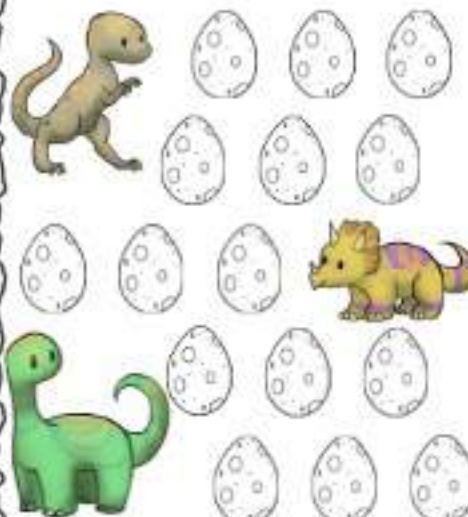

If desired, click on the first, "Reward Chart" and add the student's name to the front of the text. If no name is needed, follow the instructions below.

Click the Present button, Slideshow or Play at the top of the chart to use it with a student. The images will all appear in black and white. When a student completes one task, click the circle and the black and white image will disappear revealing a color image. Once all circles have been clicked, the student earns the incentive that was chosen.

To reset the board back to all black and white images, press escape on your computer. Any time escape is pressed, it will reset the circle. If this was done by accident, simply go back to Present and click the number times the student has earned a star. Also continue until the board is full.
