MATH GOALS AND TEMPLATE

IEP Math Goal Categories and Language

Computation Goals

STUDENT will solve (insert desired number) addition or subtraction problems without regrouping, STUDENT will answer 80% of the problems within two minutes in two out of three opportunities.

STUDENT will solve (insert desired number) addition or subtraction problems with regrouping, STUDENT will answer 80% of the problems within two minutes in two out of three opportunities.

STUDENT will solve (insert desired number) multiplication or division problems, STUDENT will correctly answer 80% of the problems within two minutes in two out of three opportunities.

STUDENT will use correct operations and solve math computation problems with 80% accuracy in three out of four trials.

STUDENT will identify the location of a graphed point by providing the numbers that represent the coordinates in two out of three trials.

Geometry Goal

STUDENT will identify, name, draw, and solve problems involving basic geometric angles with 80% accuracy.

Mathematical Application Goals

STUDENT will solve real world word problems involving a variety of math skills by identifying the problem and the necessary math processes to complete the problem with 80% or greater accuracy.

STUDENT will solve simple math computation problems by extrapolating relevant information and/or paper and pencils.

STUDENT will solve mathematical story problems involving one or two step solutions with 80% accuracy.

Measurement Goal

STUDENT will determine the length of an object with 80% accuracy.

Money Goals

STUDENT will identify the names and values of coins (penny, nickel, dime, and quarter) with 80% accuracy in three out of three trials.

When given money in the amount of \$50 and less including pennies, nickels, dimes, and quarters, STUDENT will calculate the correct amount with 80% accuracy.

Number Sense Goals

STUDENT will use ordinal numbers (1st through 10th) to describe location with 80% accuracy in two out of three trials.

STUDENT will name and order quantities up to twenty with 80% accuracy in two out of three trials.

STUDENT will identify which collection is "more," "less," and "same" by touching, pointing, or naming the collection when counting and matching sets of objects with 80% accuracy in three trials.

STUDENT will identify numbers and quantities up to (insert desired number) with 80% accuracy in two out of three trials.

STUDENT will interpret information from a mathematical graph and use the information to answer questions pertaining to the graph with 80% or greater accuracy.

When presented with text or visuals, STUDENT will identify, represent, and compare fractions including eighths, fourths, thirds, and halves with 80% or greater accuracy.

When given a number greater than 10, STUDENT will round the number to the nearest tens, hundreds, or thousands place.

When given a sequence of numbers, STUDENT will identify the next three omitted numbers with 80% accuracy.

Telling Time Goal

Using a clock, STUDENT will tell time to the (choose one: hour, half hour, quarter hour) with 80% accuracy in two out of three trials.
